SPLANJOX

Beyond Innovation. Building the Future.

Company concept: Technology, Software & Innovation

Founder: Sivaraja Pratheep

Business model: Product Development + Software Services + Research & Innovation

Primary market: Sri Lanka initially, with international expansion.

Our Purpose

We believe technology should solve meaningful problems, improve people's lives and create opportunities for businesses and communities.

Our Mission

To identify real-world challenges and transform them into practical, innovative and accessible software solutions.

Our Vision

To build a globally recognized technology and innovation company that creates impactful products, empowers businesses and contributes to a better future.

Our Core Values

1. Problem First — Understand the problem before building.
2. Innovation — Explore better solutions.
3. Quality — Build reliable products.
4. Integrity — Earn customer trust.
5. Accessibility — Make technology useful to everyone.
6. Impact — Measure success through real-world value.

Our Philosophy

We don't build software just because we can. We build software because it solves a problem.
